

Outpatient Infusion Therapy Services

Our teams at Beartooth continue to focus heavily on targeted philanthropy to support our infusion services goal of building a patient experience—focused suite on campus. The 2023 Beartooth Ball gave us a great launching point to begin to dive into the planning, raising almost \$200,000! The support received to date confirms our community need for comprehensive infusion therapy close to home.

Considering the construction costs of renovating space and equipment purchases, we still have work to do and continue our dedication to this cause.

In recent months, our volumes have grown, as has our ability to offer more specialty medications for those we serve. Our phased approach will include efforts to expand our offerings for Carbon County. Beartooth Billings Clinic is confident we can raise the needed funds to take this project across the finish line!
